Questions

Instructions

The chart below shows the price data for seven shares - A, B, C, D, E, F, and G as a candlestick plot for a particular day. The vertical axis shows the price of the share in rupees. A share whose closing price (price at the end of the day) is more than its opening price (price at the start of the day) is called a bullish share; otherwise, it is called a bearish share. All bullish and bearish shares are shown in green and red colour respectively.

Question 1

Daily loss for a share is defined as $(\text{Opening price} - \text{Closing price}) / (\text{Opening price})$. Which among the shares A, B, F and G had the highest daily loss on that day?

- A G
- B B
- C A
- D F

	OP	CP	DHP	DLP
A			2400	1200
B			2000	1400
C			1400	600
D			1200	200
E			1400	1000
F			2000	1200
G			1900	800

VIDEO SOLUTION

Question 2

Daily Share Price Variability (SPV) is defined as $(\text{Day's high price} - \text{Day's low price}) / (\text{Average of the opening and closing prices during the day})$. How many shares had an SPV greater than 0.5 on that day?

VIDEO SOLUTION

Question 3

Daily Share Price Variability (SPV) is defined as $(\text{Day's high price} - \text{Day's low price}) / (\text{Average of the opening and closing prices during the day})$. Which among the shares A, C, D and F had the highest SPV on that day?

- A F
- B A
- C D
- D C

Instructions

Directions for the next three questions:

Answer the following questions based on the information given below: Telecom operators get revenue from transfer of data and voice. Average revenue received from transfer of each unit of data is known as ARDT. In the diagram below, the revenue received from data transfer as percentage of total revenue received and the ARDT in US Dollars (USD) are given for various countries.

The X axis represents the ARDT values and the Y axis represents the % of revenue from data transfer as a percentage of the total revenue.

Question 5

If the total revenue received is the same for the pairs of countries listed in the choices below, choose the pair that has approximately the same volume of data transfer.

- A Philippines and Austria
- B Canada and Poland
- C Germany and USA

- D UK and Spain
- E Denmark and Mexico

[VIEW SOLUTION](#)

Question 6

It was found that the volume of data transfer in India is the same as that of Singapore. Then which of the following statements is true?

- A Total revenue is the same in both countries.
- B Total revenue in India is about 2 times that of Singapore.
- C Total revenue in India is about 4 times that of Singapore.
- D Total revenue in Singapore is about 2 times that of India.
- E Total revenue in Singapore is about 4 time that of India.

[VIEW SOLUTION](#)

Question 7

It is expected that by 2010, revenue from data transfer as a percentage of total revenue will triple for India and double for Sweden. Assume that in 2010, the total revenue in India is twice that of Sweden and that the volume of data transfer is the same in both the countries. What is the percentage increase of ARDT in India if there is no change in ARDT in Sweden?

- A 400%
- B 550%
- C 800%
- D 950%
- E cannot be determined

Five vendors are being considered for a service. The evaluation committee evaluated each vendor on six aspects - Cost, Customer Service, Features, Quality, Reach, and Reliability. Each of these evaluations are on a scale of 0 (worst) to 100 (perfect). The evaluation scores on these aspects are shown in the radar chart. For example, Vendor 1 obtains a score of 52 on Reliability, Vendor 2 obtains a score of 45 on Features and Vendor 3 obtains a score of 90 on Cost.

Question 8

List of all the vendors who are among the top two scorers on the maximum number of aspects is:

- A Vendor 2, Vendor 3 and Vendor 4
- B Vendor 1 and Vendor 5
- C Vendor 2 and Vendor 5
- D Vendor 1 and Vendor 2

cracku

Five vendors are being considered for a service. The evaluation committee evaluated each vendor on six aspects - Cost, Customer Service, Features, Quality, Reach, and Reliability. Each of these evaluations are on a scale of 0 (worst) to 100 (perfect). The evaluation scores on these aspects are shown in the radar chart. For example, Vendor 1 obtains a score of 52 on Reliability, Vendor 2 obtains a score of 45 on Features and Vendor 3 obtains a score of 90 on Cost.

Question (1)
On which aspect is the median score of the five vendors the least?

Reliability - 52

VIDEO SOLUTION

Question 9

A vendor's final score is the average of their scores on all six aspects. Which vendor has the highest final score?

- A Vendor 4
- B Vendor 2

C Vendor 1

D Vendor 3

Instructions

Answer these questions based on the following Information:

ABC Ltd. produces widgets for which the demand is unlimited and they can sell all of their production. The graph below describes the monthly variable costs incurred by the company as a function of the quantity produced. In addition, operating the plant for one shift results in a fixed monthly cost of Rs. 800. Fixed monthly costs for second shift operation are estimated at Rs. 1200. Each shift operation provides capacity for producing 30 widgets per month.

Note: Average unit cost, $AC = \text{Total monthly costs} / \text{monthly production}$, and Marginal cost MC is the rate of change in total cost for unit change in quantity produced.

Question 12

Suppose that each widget sells for Rs. 150. What is the profit earned by ABC Ltd. in July, if it is known that 40 widgets were produced in this month? (Profit is defined as the excess of sales revenue over total cost).

- A 2400
- B 1600
- C 400
- D 0

[VIEW SOLUTION](#)

CAT Syllabus PDF

Question 13

Total production in July is 40 units. What is the approximate average unit cost for July?

- A 3600
- B 90
- C 140
- D 115

[VIEW SOLUTION](#)

Question 14

For monthly production level in the range of 30 to 60 Units,

- A AC is always higher than MC
- B AC is always lower than MC
- C AC is lower than MC up to a certain level and then is higher than MC
- D none of the above is true

[VIEW SOLUTION](#)

Question 15

Assume that the unit price is Rs. 150 and profit is defined as the excess of sales revenue over total costs. What is the monthly production level of ABC Ltd. at which the profit is highest?

- A 30
- B 50
- C 60
- D 40

[VIEW SOLUTION](#)

CAT Formula PDF

Question 16

From the data provided it can be inferred that, for production levels in the range of 0 to 60 units,

- A MC is an increasing function of production quantity.
- B MC is a decreasing function of production quantity.
- C initially MC is a decreasing function of production quantity, attains a minimum and then it is an increasing function of production quantity.
- D none of the above.

[VIEW SOLUTION](#)

Question 17

ABC Ltd. is considering increasing the production level. What is the approximate marginal cost of increasing production from its July level of 40 units.

- A 110
- B 130
- C 150
- D 160

Instructions

Study the following graph and answer questions that follow. The x-axis denotes the years from 1983 to 1991

Question 18

Going according to previous trends, one can say that the Fertilizer Production has shown an anomalous behavior in which year?

- A 1985
- B 1984
- C 1991
- D 1989

[VIEW SOLUTION](#)

Question 19

From its apparent behaviour, the food production in year 1992 can be expected to .

- A go up
- B go down
- C remain the same as previous year.
- D nothing can be said.

[VIEW SOLUTION](#)

Question 20

If in 1988, the sum of the food and fertilizer production was 170 million tonnes, the value of food production must have been (approximately, in million tonnes) .

- A 90
- B 70
- C 100
- D Insufficient data

[VIEW SOLUTION](#)

Question 21

The sum of food and fertilizer production has shown a constant value for how many years?

- A None of the years
- B 2
- C 4
- D 5

[VIEW SOLUTION](#)

CAT Percentile Predictor

Question 22

A scholar observed that if the production of fertilizers in 1989 had been the same as that in 1988, then the total fertilizer production for all the given years would have been 450 million tonnes. Using this information, and knowing that the food production has been plotted on the same scale, one may say that the food production in 1983 was (approximately, in million tonnes) .

- A 80
- B 130
- C 105
- D Cannot be determined

Instructions

Each of the 23 boxes in the picture below represents a product manufactured by one of the following three companies: Alfa, Bravo and Charlie. The area of a box is proportional to the revenue from the corresponding product, while its centre represents the Product popularity and Market potential scores of the product (out of 20). The shadings of some of the boxes have got erased.

The companies classified their products into four categories based on a combination of scores (out of 20) on the two parameters - Product popularity and Market potential as given below:

	Promising	Blockbuster	Doubtful	No-hope
Product popularity score	>10	>10	≤ 10	≤ 10
Market potential score	>10	≤ 10	>10	≤ 10

The following facts are known:

- Alfa and Bravo had the same number of products in the Blockbuster category.
- Charlie had more products than Bravo but fewer products than Alfa in the No-hope category.
- Each company had an equal number of products in the Promising category.
- Charlie did not have any product in the Doubtful category, while Alfa had one product more than Bravo in this category.
- Bravo had a higher revenue than Alfa from products in the Doubtful category.
- Charlie had a higher revenue than Bravo from products in the Blockbuster category.
- Bravo and Charlie had the same revenue from products in the No-hope category.
- Alfa and Charlie had the same total revenue considering all products.

Question 23

Which of the following statements is NOT correct?

- A Alfa's revenue from Blockbuster products was the same as Charlie's revenue from Promising products
- B Bravo's revenue from Blockbuster products was greater than Alfa's revenue from Doubtful products
- C Bravo and Charlie had the same revenues from No-hope products
- D The total revenue from No-hope products was less than the total revenue from Doubtful products

VIDEO SOLUTION

Question 24

Considering all companies' products, which product category had the highest revenue?

- A No-hope
- B Blockbuster
- C Doubtful
- D Promising

VIDEO SOLUTION

CAT Score Calculator

Question 25

Which of the following is the correct sequence of numbers of products Bravo had in No-hope, Doubtful, Promising and Blockbuster categories respectively?

- A 1,3,1,2
- B 1,3,1,3
- C 3,3,1,2
- D 2,3,1,2

[VIDEO SOLUTION](#)

Question 26

If the smallest box on the grid is equivalent to revenue of Rs.1 crore, then what approximately was the total revenue of Bravo in Rs. crore?

- A 40
- B 24
- C 34
- D 30

[VIDEO SOLUTION](#)

The table below gives information about four different crops, their different quality, categories and the regions where they are cultivated. Based on the information given in the table answer the questions below.

Type of Crop	Quality	Region
Crop - 1	High	R1, R2, R3, R4, R5
	Medium	R6, R7, R8
	Low	R9, R10, R11
Crop - 2	High	R5, R8, R12
	Medium	R9, R13
	Low	R6, R7, R8
Crop - 3	High	R2, R6, R7, R13
	Medium	R3, R9, R11
	Low	R1, R4
Crop - 4	High	R3, R10, R11
	Medium	R1, R2, R4
	Low	R5, R9

Question 27

How many low quality Crop-1 producing regions are either high quality Crop-4 producing regions or medium quality Crop-3 producing regions?

- A One
- B Two
- C Three
- D Zero

[VIEW SOLUTION](#)

Question 28

Which of the following statements is true?

- A All medium quality Crop-2 producing regions are also high quality Crop-3 producing regions.
- B All high quality Crop-1 producing regions are also medium and low Crop-4 producing regions.
- C There are exactly four Crop-3 producing regions, which also produce Crop-4 but not Crop-2.
- D Some Crop-3 producing regions produce Crop-1, but not high quality Crop-2.

[VIEW SOLUTION](#)

Question 29

How many regions produce medium qualities of Crop-1 or Crop-2 and also produce low quality of Crop-3 or Crop-4?

- A Zero
- B One
- C Two
- D Three

Instructions

Five countries engage in trade with each other. Each country levies import tariffs on the other countries. The import tariff levied by Country X on Country Y is calculated by multiplying the corresponding tariff percentage with the total imports of Country X from Country Y.

The radar chart below depicts different import tariff percentages charged by each of the five countries on the others. For example, US (the blue line in the chart) charges 20%, 40%, 30%, and 30% import tariff percentages on imports from France, India, Japan, and UK, respectively. The bar chart depicts the import tariffs levied by each country on other countries. For example, US charged import tariff of 3 billion USD on UK.

Import Tariff Percentage Charged by Each Country from Other Countries

Import tariff in Billion USD charged by each country on other countries

Assume that imports from one country to another equals the exports from the latter to the former.

The trade surplus of Country X with Country Y is defined as follows.

Trade surplus = Exports from Country X to Country Y - Imports to Country X from Country Y.

A negative trade surplus is called trade deficit.

Question 30

How much is Japan's export to India worth?

- A 8.5 Billion USD
- B 16.0 Billion USD
- C 7.0 Billion USD
- D 1.75 Billion USD

[VIEW SOLUTION](#)

Question 31

Which among the following is the highest?

- A Exports by Japan to UK
- B Imports by US from France
- C Exports by France to Japan
- D Imports by France from India

[VIEW SOLUTION](#)

Question 32

Among France and UK, who has/have trade surplus(es) with US?

- A Neither France nor UK
- B Both France and UK
- C Only UK
- D Only France

[VIEW SOLUTION](#)

Question 33

What is the trade surplus/trade deficit of India with UK?

- A Surplus of 15.0 Billion USD
- B Deficit of 15.0 Billion USD
- C Surplus of 10.0 Billion USD
- D Deficit of 10.0 Billion USD

Instructions

The two plots below show data for four companies code-named A, B, C, and D over three years - 2019, 2020, and 2021.

The first plot shows the revenues and costs incurred by the companies during these years. For example, in 2021, company C earned Rs.100 crores in revenue and spent Rs.30 crores. The profit of a company is defined as its revenue minus its costs

The second plot shows the number of employees employed by the company (employee strength) at the start of each of these three years, as well as the number of new employees hired each year (new hires). For example, Company B had 250 employees at the start of 2021, and 30 new employees joined the company during the year.

Question 34

Considering all three years, which company had the highest annual profit?

- A Company A
- B Company D
- C Company B
- D Company C

VIDEO SOLUTION

Question 35

Which of the four companies experienced the highest annual loss in any of the years?

- A Company C
- B Company A
- C Company B

D Company D

VIDEO SOLUTION

Question 36

The ratio of a company's annual profit to its annual costs is a measure of its performance. Which of the four companies had the lowest value of this ratio in 2019?

- A Company A
- B Company D
- C Company B
- D Company C

Question 37

The total number of employees lost in 2019 and 2020 was the least for:

- A Company B
- B Company D

C Company A

D Company C

VIDEO SOLUTION

Question 38

Profit per employee is the ratio of a company's profit to its employee strength. For this purpose, the employee strength in a year is the average of the employee strength at the beginning of that year and the beginning of the next year. In 2020, which of the four companies had the highest profit per employee?

A Company D

B Company C

C Company B

D Company A

VIDEO SOLUTION

Instructions

The two plots below give the following information about six firms A, B, C, D, E, and F for 2019 and 2023.

PAT: The firm's profits after taxes in Rs. crores,

ES: The firm's employee strength, that is the number of employees in the firm, and

PRD: The percentage of the firm's PAT that they spend on Research and Development (R&D).

In the plots, the horizontal and vertical coordinates of point representing each firm gives their ES and PAT values respectively. The PRD values of each firm are proportional to the areas around the points representing each firm. The areas are comparable between the two plots, i.e., equal areas in the two plots represent the

same PRD values for the two years.

Question 39

Which among the firms A, C, E, and F had the maximum PAT per employee in 2023?

- A Firm E
- B Firm A
- C Firm F
- D Firm C

VIDEO SOLUTION

Question 40

Assume that the annual rate of growth in PAT over the previous year (ARG) remained constant over the years for each of the six firms. Which among the firms A, B, C, and E had the highest ARG?

- A Firm A
- B Firm C
- C Firm E

D Firm B

[VIDEO SOLUTION](#)

Question 41

The ratio of the amount of money spent by Firm C on R&D in 2019 to that in 2023 is closest to

- A 9 : 4
- B 5 : 6
- C 5 : 9
- D 9 : 5

[VIDEO SOLUTION](#)

Question 42

Which among the firms C, D, E, and F had the least amount of R&D spending per employee in 2023?

- A Firm F
- B Firm D
- C Firm C
- D Firm E

Anirbid, Chandranath, Koushik, and Suranjan participated in a puzzle solving competition. The competition comprised 10 puzzles that had to be solved in the same sequence, i.e., a competitor got access to a puzzle as soon as they solved the previous puzzle. Some of the puzzles were visual puzzles and the others were number-based puzzles. The winner of the competition was the one who solved all puzzles in the least time.

The following charts describe their progress in the competition. The chart on the left shows the number of puzzles solved by each competitor at a given time (in minutes) after the start of the competition. The chart on the right shows the number of visual puzzles solved by each competitor at a given time (in minutes) after the start of the competition.

Question 43

At what number in the sequence was the fourth number-based puzzle?

VIEW SOLUTION

Question 44

Who had solved the largest number of puzzles by the 20-th minute from the start of the competition?

A Chandranath

- B Koushik
- C Suranjan
- D Anirbid

[VIEW SOLUTION](#)

Question 45

Which of the following is the closest to the average time taken by Anirbid to solve the number-based puzzles in the competition?

- A 3.3 minutes

To compare the rainfall data, India Meteorological Department (IMD) calculated the Long Period Average (LPA) of rainfall during period June-August for each of the 16 states. The figure given below shows the actual rainfall (measured in mm) during June-August, 2019 and the percentage deviations from LPA of respective states in 2018. Each state along with its actual rainfall is presented in the figure.

Question 47

If a 'Low Monsoon State' is defined as a state with actual rainfall from June-August, 2019 of 750 mm or less, then what is the median 'deviation from LPA' (as defined in the Y-axis of the figure) of 'Low Monsoon States'?

- A -10%
- B 10%
- C -20%
- D -30%

cracku

To compare the rainfall data, India Meteorological Department (IMD) calculated the Long Period Average (LPA) of rainfall during period June-August for each of the 16 states. The figure given below shows the actual rainfall (measured in mm) during June-August, 2019 and the percentage deviations from LPA of respective states in 2018. Each state along with its actual rainfall is presented in the figure.

Actual rainfall from June to August 2019

Question (1)

If a 'Heavy Monsoon State' is defined as a state with actual rainfall from June-August, 2019 of 900 mm or more, then approximately what percentage of 'Heavy Monsoon States' have a negative deviation from respective LPAs in 2019?

Handwritten note: 40%

VIDEO SOLUTION

Question 48

What is the average rainfall of all states that have actual rainfall of 600 mm or less in 2019 and have a negative deviation from LPA?

- A 367 mm
- B 500 mm

C 450 mm

Question 49

If a 'Heavy Monsoon State' is defined as a state with actual rainfall from June-August, 2019 of 900 mm or more, then approximately what percentage of 'Heavy Monsoon States' have a negative deviation from respective LPAs in 2019?

A 42.86

B 75.00

C 57.14

D 14.29

VIDEO SOLUTION

Question 50

The LPA of a state for a year is defined as the average rainfall in the preceding 10 years considering the period of June-August. For example, LPA in 2018 is the average rainfall during 2009-2018 and LPA in 2019 is the average rainfall during 2010-2019. It is also observed that the actual rainfall in Gujarat in 2019 is 20% more than

the rainfall in 2009. The LPA of Gujarat in 2019 is closest to

- A 475 mm
- B 505 mm
- C 490 mm
- D 525 mm

VIDEO SOLUTION

Instructions

A large store has only three departments, Clothing, Produce, and Electronics. The following figure shows the percentages of revenue and cost from the three departments for the years 2016, 2017 and 2018. The dotted lines depict percentage levels. So for example, in 2016, 50% of store's revenue came from its Electronics department while 40% of its costs were incurred in the Produce department

In this setup, Profit is computed as (Revenue - Cost) and Percentage Profit as $\text{Profit}/\text{Cost} \times 100\%$.

It is known that

1. The percentage profit for the store in 2016 was 100%.
2. The store's revenue doubled from 2016 to 2017, and its cost doubled from 2016 to 2018.
3. There was no profit from the Electronics department in 2017.
4. In 2018, the revenue from the Clothing department was the same as the cost incurred in the Produce department.

Question 51

What was the ratio of revenue generated from the Produce department in 2017 to that in 2018?

- A 16 : 9
- B 4 : 3
- C 9 : 16
- D 8 : 5
